Cimarron River Pipeline, LLC, a wholly owned subsidiary of DCP Midstream, LP, is planning an expansion of its interstate natural gas pipeline system. The Cimarron expansion will include approximately 48 miles of new 20” and 30” natural gas pipeline from Cimarron’s existing facilities in Beaver County, Okla., extending north to DCP’s National Helium Gas Processing Plant in Seward County, Ks. The project will also include the lease of approximately 21 miles of 26-inch natural gas pipeline extending from Texas County, Okla. to Beaver County, Okla. The expansion is designed to transport up to 631,300 MMBtu/day* through the 30” pipeline. The capital investment for the expansion is expected to be approximately $107 million.

- Business Segment: Logistics
- Region: Mid-Continent
- Location: Beaver County, Okla.
- Scope: An approximately 48 mile extension of 20” and 30” natural gas pipeline from Cimarron’s Beaver Station to DCP’s National Helium Gas Processing Plant
- Capacity: 631,300 British Thermal Units per day (MMBtu/day)
- Type of Project: Organic
- Ownership: 100 percent by DCP Midstream, LP
- Projected in-service date: Q3 2019
